

IoT Platform with Scales and Operational & Performance Notifications

The Foodservice Sustainability Solutions IoT Platform is a powerful, OEM-designed, cloud-connected solution, engineered to optimize the performance of Food Waste Dehydrators equipped with factory-installed smart hardware and software. This advanced platform delivers real-time system insights, automated alerts, and direct technical support—helping operators maximize uptime, reduce waste, and achieve Sustainability and Compliance Benchmarks. Intuitive, step-by-step touch-screen operation makes it easy for operators of all experience levels to quickly become proficient with our modern Compost Accelerator™.

Key Features

✔ Remote Monitoring & Status Notifications

Continuous monitoring of mechanical and system health with time-stamped alerts for any operational change, enabling rapid, accurate troubleshooting and faster response times.

✔ Operating, Performance and ESG Metric Tracking

- Align performance tracking with corporate sustainability and ESG goals (Input/Output Weight)
- Customize data reporting to meet specific operational and compliance goals

✔ Cloud-Based Data Storage & Analytics Secure cloud archiving enables:

- Scales enable tracking input/output weight and support one's diversion data tracking
- Predictive maintenance insights
- Remote diagnostics
- Long-term trend analysis for performance optimization

✔ Premium Technical Support – Options based on Service & Maintenance Contract

- Integrated support dashboard for Live system diagnostics
- U.S.-based OEM Engineers available via web/phone
- FSS Field Technicians available for on-site support
- Live video assistance
- Internet Connection Required: System must be powered and connected via Ethernet or for full functionality.
- Support Options: Remote (web/phone) or On-Site with Certified FSS Technician
